

# Be compliant!

## Recordkeeping

Always available and accessible business communication history in the case of a legal dispute or investigation.

## Data security

Your employees don't have to use their own private messengers for work, potentially able to share business or client information! Also, no sensitive information remains on a phone of leaving employee.

## Compliance probes

Avoid fines from regulatory authorities\* over missing B2C correspondence.

# Leap Work – App stores

# Own your data!

## Access to all your business data

Always accessible business communication history, even on the smartphone of a leaving employee!

## Access to all communication history

Always available and accessible business communication history in the case of a compliance probe or a legal dispute!

## True and unchanged history

100% complete business communication history, even when a client deletes his WhatsApp messages or a Telegram chat!

## FMOP - Federated Messaging Orchestration Platform

Federated Messaging Orchestration Platform (FMOP) – a concept that elevates **messaging between company employees and clients** (individuals or companies B2C/B2B), to the level of calling and emailing.

Messaging Orchestration dictates how messaging threads are flowing between actors outside of an enterprise and multiple parties inside the organization, over a variety of messaging channels, involving a multitude of different message types.

FMOP allows control of one-to-one and group chats, conversation amplification with bots and integration with different enterprise systems. It also defines dynamic and extensible components that allow real time processing of message streams, enabling companies to create workflows to meet always evolving enterprise needs.

## Benefits for your company

Record & own all B2C communication history.

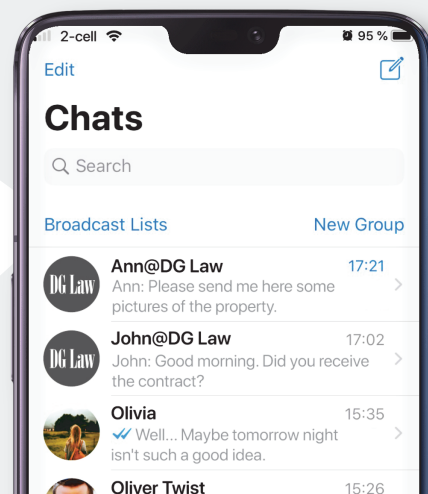

Consult in group chats (employees/clients).

Choose messaging app for each client.

Minimize the risk of clients being poached.

Receive immediate response.

Advertise your company.

### INTEGRATION WITH ADDITIONAL ENTERPRISE SERVICES
